

Waste and Recycling Policy

KK Security Services Ltd believes in promoting sustainability through prudent waste management and recycling. We attempt to lower our use of materials, reuse materials when we can, and attempt to recycle materials and utilize recycled materials whenever possible. We keep these principles in mind in managing office products, including paper, electronic equipment including computers, plastic, glass, cans, and batteries.

To carry out these goals we educate and inform our staff about this policy and these issues, make recycling receptacles available on our premises, use suppliers, whenever possible, who will aid in collecting and recycling used products that they have supplied, and always seek waste reduction, waste recycling and waste minimization information from suppliers and vendors we utilize.
